## Work Experience

**2015-ongoing**

**Majesco Software and Solutions India Pvt Ltd, Navi Mumbai**

Part of this organization since June 15, 2015. Working as an User Interface Developer. My Initial responsibilities were to create prototypes for all the projects at Majesco and also design support for the projects.

Later started to work on actual projects on AngularJS and BackboneJS technologies. Currently handling both Front-end and Back-end Technologies in my current project.

---

## Projects

**2016-ongoing**

**New York life Insurance Application Portal**

Its a web application portal for the customers to apply for the NYL insurance. We have all together 28 TPA for which we have developed separate sites so that their customers apply for the insurance.

We have a admin portal as well so that each TPAs will login to it decide whether to accept or reject the application based on their underwriting rule.

**2015-2016**

**Majesco Claims**

Its a company product where customers can claim their insurance based on their Line of Business. We have about 6 Line of Business as of now. My role on this project was to build Prototype for development group according to the wireframes given by design team.

---

## Achievements
